# Commentarius

CIS 641 Final Presentation

Ellie Mitchell • 12.15.2021

---

# What is Commentarius?

- 'Commentarius' means 'diary' in Latin
- Uninterrupted diary entries
- Custom tags for categorizing text
- Download tagged text

---

---

---

# Project Time Goals

- Was on track at midterms
  - Did a lot of work early in the semester
  - Finished project on time
-

# What's Changed?

- Debugged
- Fixed some styling issues
- Added text downloading functionality
- Tested
- Cleaned up code

# Change Management Plan

1. Announcing the change
  - a. What the software is
  - b. Why it's useful
2. Distribution
3. Training
  - a. In-person/virtual
  - b. Hands-on learning

---

# Integration

- Application is Mac/Windows-compatible.
- Less than 2% of computer users use Linux, so this isn't a major concern.

# Bug Detection

- Creator's contact information provided for bug reporting.
  - Users are encouraged to report bugs.
  - The creator can then fix the problem and release new version of the application.
-

# Feedback

- Feedback email will be sent out after distribution
- This will ask users to give:
  - Approval rating
  - Description of complaints
  - How many times use application/day
  - Describe why program should be used
- If there are a lot of complaints/reluctant users, more emails will be sent out demonstrating functionality and sharing positive user experiences.
